

ENVIRONMENT POLICY STATEMENT.

Gauge Factors Ltd recognises that our day to day operations inevitably impact on the environment in a number of ways and ultimately have an effect on the local regional and global environment. As a consequence of this the management are committed to minimising any potentially harmful effects of activities wherever and whenever possible.

As a result of our continued commitment to quality in all our activities, Gauge Factors Ltd has developed an environmental policy statement that will enable us to minimise our negative impact on the environment. Specific areas Gauge Factors Ltd will address are:

Improving housekeeping and maximising the efficient use of energy and water. Promoting recycling and the use of recycled materials while reducing consumption of materials wherever possible. Disposing of all waste through safe and responsible methods.

Continually improving environmental performance and preventing pollution wherever possible

Meeting and where appropriate exceeding the requirements of all relevant legislation. Working towards an environmental management system to the requirements of BS8555 leading to the international standard ISO 14001:2004

Working with Gauge Factors Ltd suppliers and contractors to encourage the adoption of environmentally responsible practices.

Communicating environmental awareness to all Gauge Factors Ltd employees during training programmes and encouraging the implementation of sound environmental practices.

Including environmental consideration in our materials ordering procedure, aiming to conserve resources through efficient use and careful planning.

Setting realistic targets and goals to improve our environmental performance and aiming to monitor and review progress annually by self-evaluation.

Responsibility for Gauge Factors Ltd environmental policy lies with the Managing Director. This policy is publicly available on request.
